Profile Summary

Full Stack Developer skilled in designing and building secure, scalable, and high-performance web applications. Experienced with modern technologies, including React, Node.js, Express, MongoDB, and cloud platforms such as AWS and Azure. Strong expertise in both frontend and backend development, API integration, and database management. Passionate about clean code, problem-solving, and delivering user-focused solutions in agile environments. Continuously exploring modern frameworks and cloud technologies to deliver scalable, innovative solutions.

Education

BSc (Hons) Computer Sciences and Technology

2021-Present

Sabaragamuwa University of Sri Lanka

Major: Web Development | Minor: Machine Learning

Core Competencies

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind, Webpack

Backend: Node.js, Express, Nest.js

Databases & Cloud: MongoDB, MySQL, AWS, Azure

DevOps & Tools: Git, Docker, CI/CD

Other: Python, AI & ML, Agile, UI/UX, SEO, Software Architecture

Projects

Personal Portfolio Website – Full-Stack Development (GitHub/Live)

2025

Developed and deployed a responsive personal portfolio website using React and Tailwind CSS with dark/light mode for enhanced UX. Integrated EmailJS for real-time contact form functionality

and deployed on Vercel with a custom domain via Namecheap. Designed a modular, scalable codebase showcasing projects, skills, and resume downloads. Ensured optimized performance with SEO-friendly design and mobile-first responsiveness

CPIRA – Construction Property Inspection & Reporting App (GitHub)

2025

A role-based full-stack web app built with ReactJS, Node.js, and MongoDB to streamline construction inspections. The platform provides separate dashboards for customers, constructors, and inspectors, enabling project tracking, inspection scheduling, defect reporting, and media uploads. It also features a built-in messaging system and secure role-based authentication, ensuring efficient collaboration, transparency, and accountability across construction projects..

URL Shortener App - Full-Stack Link Management System (GitHub)

2025

A production-grade web application for converting long URLs into short, shareable links. Developed using React, Node.js, Express, and MongoDB to provide users with click analytics and secure link management. Features include JWT authentication, real-time statistics tracking, and responsive dashboard design

Zynvert – File Converter Web App (GitHub)

2025

Built a fast and secure file conversion tool that supports PDFs, Word docs, and images (JPG, PNG, GIF, WEBP). Designed with React (Vite) and Node.js, it processes files in real-time without storing them, ensuring privacy. The app features a clean, user-friendly interface with drag-and-drop functionality and live progress updates. Optimized performance to handle users at once, making conversions 70% faster than traditional tools.

Fake News Detector – AI-Powered Analysis Tool (GitHub)

2025

Developed a full-stack web app using React and Node.js that detects fake news. Integrated Hugging Face's BART model for ML classification and implemented custom rules for clickbait/bias detection. Designed a privacy-focused system that processes text in real-time without storage. Optimized performance to handle 50+ concurrent requests with 70% faster analysis than manual fact-checking.
